NVS Boaters
NVS Maritime Ops

Rachel Wold
rwold@uw.edu
Boaters App features include:

- NOAA nautical charts
- Routing capabilities
- Near-real time weather and sea conditions
- Surface current, wind, wave and weather forecasts
- Tide forecasts and water level plots
- Marina information and a satellite image of the dock
Click the 'New Route' button to start a new route.

If you sign in, route information will automatically be saved to your account.
Compare forecasts and current conditions.
Maritime Ops App features include:

- NOAA nautical charts
- Routing capabilities
- Near-real time weather and sea conditions
- Surface current, wind, wave and weather forecasts
- Tide forecasts and water level plots
- Marina information and a satellite image of the dock
- **Virtual wave stations**
Discussion Questions:

• Is the app giving you the information you need?
• Can you find the information you’re looking for? If so, is it presented in a way that is useful?
• Are you using NVS while out on the water or before going out?
• Do you use the “Current Conditions” feature? If so, for what purpose(s)?
• Do you use the “Routes” feature? If so, how?
• Other....
